

प्रदेश लोक सेवा आयोग, प्रदेश नं.२  
नेपाल इन्जिनियरिङ्ग सेवा जियोलोजी समूह अन्तर्गतका जनरल जियोलोजी, हाइड्रोजियोलोजी र इन्जिनियरिङ्ग जियोलोजी  
उपसमूहहरूका राजपत्राङ्कित तृतीय श्रेणी/सातौँ तहको खुला प्रतियोगितात्मक परीक्षाका पाठ्यक्रम

यस पाठ्यक्रम योजनालाई दुई चरणमा विभाजन गरिएको छ :

प्रथम चरण :-	लिखित परीक्षा (Written Examination)	पूर्णाङ्क :- २००
द्वितीय चरण :-	(क)सामूहिक परीक्षण (Group Test)	पूर्णाङ्क :- १०
	(ख) अन्तर्वार्ता(Interview)	पूर्णाङ्क :- ३०

**परीक्षा योजना (Examination Scheme)**

प्रथम चरण : लिखित परीक्षा (Written Examination)

पूर्णाङ्क :- २००

पत्र	विषय	खण्ड	पूर्णाङ्क	उर्तीर्णाङ्क	परीक्षा प्रणाली		पश्नसंख्या अङ्क	समय
प्रथम	General Subject	Part I: General Awareness & General Ability Test	१००	४०	वस्तुगत (Objective)	बहुवैकल्पिक प्रश्न (MCQs)	५० प्रश्न ० १ अङ्क	१ घण्टा ३० मिनेट
		Part II: General Technical Subject					५० प्रश्न ० १ अङ्क	
द्वितीय	Technical Subject		१००	४०	विषयगत (Subjective)	छोटो उत्तर लामा उत्तर	४ प्रश्न × ५ अङ्क ८ प्रश्न × १०अङ्क	३ घण्टा

द्वितीय चरण : सामूहिक परीक्षण (Group Test) र अन्तर्वार्ता (Interview)

पूर्णाङ्क :- ४०

पत्र /विषय	पूर्णाङ्क	उर्तीर्णाङ्क	परीक्षा प्रणाली	समय
सामूहिक परीक्षण (Group Test)	१०		सामूहिक छलफल (Group Discussion)	३० मिनेट
अन्तर्वार्ता (Interview)	३०		बोर्ड अन्तर्वार्ता(Board Interview)	-

द्रष्टव्य :

- लिखित परीक्षाका माध्यम भाषा नेपाली वा अंग्रेजी अथवा नेपाली र अंग्रेजी दुवै हुनेछ ।
- प्रथमपत्र र द्वितीयपत्रका लिखित परीक्षा छुट्टाछुट्टै हुनेछ ।
- वस्तुगत बहुवैकल्पिक (Multiple Choice) प्रश्नहरूको गलत उत्तर दिएमा प्रत्येक गलत उत्तर बापत २० प्रतिशत अङ्क कट्टा गरिनेछ । तर उत्तर नदिएमा त्यस बापत अङ्क दिइने छैन र अङ्क कट्टा पनि गरिने छैन ।
- बहुवैकल्पिक प्रश्नहरू हुने परीक्षामा कुनै प्रकारको क्याल्कुलेटर (Calculator) प्रयोग गर्न पाइने छैन ।
- विषयगत प्रश्नहरूका हकमा तोकिएको अंकका एउटा लामा प्रश्न वा एउटा प्रश्नका दुई वा दुई भन्दा बढी भाग (Two or more parts of a single question) वा एउटा प्रश्न अन्तर्गत दुई वा बढी टिप्पणीहरू (Short notes) सोध्न सकिने छ ।
- द्वितीय पत्रमा (विषयगत प्रश्न हुनेका हकमा) प्रत्येक खण्डका लागि छुट्टाछुट्टै उत्तरपुस्तिकाहरू हुनेछन् । परीक्षार्थीले प्रत्येक खण्डका प्रश्नहरूको उत्तर सोही खण्डको उत्तरपुस्तिकामा लेख्नुपर्नेछ ।
- यस पाठ्यक्रम योजना अन्तर्गतका पत्र/विषयका विषयवस्तुमा जेसुकै लेखिएका भए तापनि पाठ्यक्रममा परेका कानून, ऐन, नियम तथा नीतिहरू परीक्षाका मिति भन्दा ३ महिना अगाडि (संशोधन भएका वा संशोधन भइ हटाईएका वा थप गरी संशोधन भई) कायम रहेकालाई यस पाठ्यक्रममा परेका सम्भन्धन पर्दछ ।
- प्रथम चरणका परीक्षाबाट छनौट भएका उम्मेदवारहरूलाई मात्र द्वितीय चरणका परीक्षामा सम्मिलित गराइनेछ ।
- यस भन्दा अगाडि लागू भएका माथि उल्लेखित सेवा, समूहको पाठ्यक्रम खारेज गरिएका छ ।
- पाठ्यक्रम लागू मिति : - २०७७/०८/२४

**प्रथम पत्र (Paper I): General Subject**

**Part (I) : - General Awareness & General Ability Test (50 Marks)**

1. **General Awareness and Contemporary Issues (25 ×1 Mark = 25 Marks)**
  - 1.1 Physical, socio-cultural and economic geography and demography of Nepal
  - 1.2 Major natural resources of Nepal
  - 1.3 Geographical diversity, climatic conditions, and livelihood & lifestyle of people
  - 1.4 Notable events and personalities, social, cultural and economic conditions in modern history of Nepal
  - 1.5 Current periodical plan of Nepal
  - 1.6 Information on sustainable development, environment, pollution, climate change, biodiversity, science and technology
  - 1.7 Nepal's international affairs and general information on the UNO, SAARC & BIMSTEC
  - 1.8 The Constitution of Nepal (From Part 1 to 5 and Schedules)
  - 1.9 Governance system and Government (Federal, Provincial and Local)
  - 1.10 Provisions of civil service act and regulation relating to constitution of civil service, organisational structure, posts of service, fulfillment of vacancy and code of conduct
  - 1.11 Functional scope of public services
  - 1.12 Public Service Charter
  - 1.13 Concept, objective and importance of public policy
  - 1.14 Fundamentals of management : planning, organizing, directing, controlling, coordinating, decision making, motivation and leadership
  - 1.15 Government planning, budgeting and accounting system
  - 1.16 Major events and current affairs of national and international importance
  - 1.17 Province Government Province no.2 Engineering related act, rules and regulations.
  - 1.18 Province no.2, province level infrastructures and statistics.
  - 1.19 Three level government co-ordinations
2. **General Ability Test (25 ×1 Mark = 25 Marks)**
  - 2.1 **Verbal Ability Test (8×1 Mark = 8 Marks)**

Jumble words, Series, Analogy, Classification, Coding-Decoding, Matrix, Ranking Order Test, Direction and Distance Sense Test, Common Sense Test, Logical Reasoning, Assertion and Reason, Statement and Conclusions
  - 2.2 **Numerical Ability Test (9×1 Mark = 9Marks)**

Series, Analogy, Classification, Coding, Arithmetical reasoning/operation, Percentage, Ratio, Average, Loss & Profit, Time & Work, Data interpretation & Data verification
  - 2.3 **Non-verbal/Abstract Ability Test (8×1 Mark = 8 Marks)**

Figure Series, Figure Analogy, Figure Classification, Figure Matrix, Pattern Completion/Finding, Analytical Reasoning Test, Figure Formation and Analysis, Rule Detection, Water images, Mirror images, Cubes and Dice & Venn-diagram

**Part (II) : - General Technical Subject (50 Marks)**

1. **Crystallography and Mineralogy:** (5 Marks)
  - 1.1 Crystallography: Crystal system and classes, symmetry elements, crystal notations, crystal morphology, measurement of crystal angles, spherical and stereographic projection, determination of axial ratios. Intergrowth of crystals, causes, effects and origin of twinning.
  - 1.2 Optical Mineralogy: Polarized light, isotropic and anisotropic crystals, uniaxial and biaxial crystals and their indicatrices and interference pattern. Accessory plates and Berek compensator. Crystal in the convergent light and determination of their optic signs.
  - 1.3 Descriptive Mineralogy: Nomenclature and important physical properties of minerals. Native elements, sulphides, chromates, sulphates, halites, borates, tungstet, molybdates, phosphates, arsenats, and vanadates, carbonates, oxides and hydroxides. Rock forming minerals. Silica and silicates, nesosilicates, sorosilicates, cyclosilicates, phyllosilicates and tectosilicates.
2. **Geology of Nepal Himalaya** (5 Marks)
  - 2.1 Overview of the geology of the Himalaya.
  - 2.2 Physiographic and geological divisions of Nepal.
  - 2.3 Tectonic division of Nepal Himalaya: Terai, Siwaliks, Lesser Himalaya, Higher Himalaya and Tibetan Tethys.
  - 2.4 Main characteristics and kinematic history of the Main Frontal Thrust, Main Boundary Thrust, Main Central Thrust and the South Tibetan Detachment System.
  - 2.5 Magmatism, metamorphism and mineral deposits of the Nepal Himalaya.
  - 2.6 Recent researches in various aspects of Nepal Himalaya.
3. **Igneous and Metamorphic Rocks** (5 Marks)
  - 3.1 Classification of Igneous Rocks: Mineralogical classification, chemical classification, geological occurrences and associations. Nomenclature of igneous rocks.
  - 3.2 Characteristic of Magma: Temperature, pressure, density. Constitution of magma. Kinetics of magma: Viscosity, diffusion, formation of crystals.
  - 3.3 Crystallization of Magma: Crystallization and melting as changes in state. Crystallization and melting intervals of different magma composition, sequential segregation during crystallization, crystal melt equilibria in magmatic systems. Role of volatiles in the phase equilibria of magmatic system. Changes in phase relationships with pressure and temperature.
  - 3.4 Generation of Magmas: Cause of melting, tectonic environments of melting, melting in non-tectonic environments. Inclusions derived from the mantle.
  - 3.5 Occurrence and Origin of Intermediate to Felsic Associations: Granite, diorite, basalt, andesite, dacite, rhyolite, epicontinental andesitic environments. Ash flow caldera, shallow batholith complex, granitoid batholiths in arc environments.

- 3.6 Occurrence and Origin of Mafic and Ultramafic Associations: Ophiolites, basalts, diabase, dykes and sills, gabbroic layered intrusions.
  - 3.7 Occurrence and Origin of alkaline Association: General features, mineralogy, chemistry, phase relationship, variations in individual complexes or rock bodies.
  - 3.8 Concept of Metamorphism, types of metamorphism, compositional group.
  - 3.9 Nomenclature and distribution of metamorphic rocks.
  - 3.10 Basic Characteristics of Metamorphic reactions: Movement of constituents, kinetics of metamorphic mineral reactions, determination of parent rocks. Causes of regional metamorphism. Prograde and retrograde metamorphism.
  - 3.11 Metamorphic Facies: High to moderate pressure facies at low temperature, moderate pressure facies, high pressure facies, low pressure facies, mylonitic rocks. Metamorphic grades, index minerals, paired metamorphic belts and geothermal gradients, chemical geothermometers and geobarometers. Temperature and pressure corresponding to individual metamorphic facies.
  - 3.12 Description, occurrences and origin of metamorphic rock associations. Type of metamorphism: Cataclastic metamorphism, Contact metamorphism, Burial metamorphism, Regional metamorphism, Ocean floor metamorphism.
  - 3.13 Igneous rock association relation to regional metamorphism. Geological mapping of metamorphic terrain.
  - 3.14 Common metamorphic and igneous rocks of Nepal.
4. **Sedimentary Rocks** **(5 Marks)**
- 4.1 Sedimentary Particles: Transported in the solid state, precipitated and biogenic particles. Sedimentary processes: Physical processes and dynamics of moving particles, Bio-chemical processes. Weathering and geochemical cycle of sediments.
  - 4.2 Properties of Sediments: Texture, grain size and provenance. Grain size and depositional processes. Shape and roundness. Surface features. Manner of packing and orientation. Maturity of sediments. Density, porosity, permeability.
  - 4.3 Methods of Sedimentological Study: Mechanical analysis of sediments. Grade scale. Grain size distribution. Phi scale. Normal distribution, cumulative frequency distribution and its characteristics. Shape analysis and its significance. Mineral separation, mineral stability.
  - 4.4 Structure of Sedimentary Rocks: Bedding and cross lamination, graded bedding. Sole marks, mud cracks, surface marks, penecontemporaneous deformation structures. Sandstone dykes and sills. Convolute beddings. Stromatolites and other biogenic structures. Trace fossils.
  - 4.5 Diagenesis: Dissolution, precipitations, cementation and compaction.
  - 4.6 Classification of Sediments and Sedimentary Rocks: Conglomerate, breccia, and gravel. Sand, sandstone, siltstone, argillite, shale and claystone. Limestone and dolomite. Volcanoclastic sediments. Cherts and other siliceous sediments. Iron bearing sediments, glauconite, phosphorite and other evaporates. Carbonaceous sediments, coal and oil shale.
  - 4.7 Paleocurrents, paleogeography.

- 4.8 Environment of Deposition: Desert, fluvial, lacustrine, glacial, coastal, deltaic, estuarine and marine environments.
- 4.9 Common sedimentary rocks of Nepal.
5. **Stratigraphy and Paleontology** (5 Marks)
- 5.1 Principles of stratigraphy, geological timescale, law of superposition.
- 5.2 Distribution of organism in space and time, and their role in stratigraphy.
- 5.3 Stratigraphy and Tectonics: Tectonic interpretations, method of stratigraphy, litho, bio, magneto and chrono-stratigraphy. Dating of rocks, stratigraphic nomenclature, lateral variation and facies. Rock units, time rock units, biostratigraphic units.
- 5.4 Correlation of litho, bio, magneto and chrono-stratigraphic units. Limitation and subjective nature of correlation. Construction of ancient sedimentary environments and related stratigraphic implications.
- 5.5 Relevance of paleontology to the problems in the earth science. Bionomical nomenclature. Grouping of species into higher categories. Conservation law and fossilization. Origin of life.
- 5.6 Marine ecosystem, biosphere and living and fossil population adapting and functional morphology. Evolution and fossils records of different groups of organism through geological ages.
- 5.7 Micropaleontology: Definition and scope. Types of microfossils and their classification, taxonomic nomenclature. Fundamentals of biostratigraphy, ecology, paleoecology.
- 5.8 Morphology, classification, ecology and geological history of the following groups: Brachiopods, gastropods, bivalves, trilobites, ammonites, belemnites and other index fossils.
- 5.9 Biogeography of fossil plants and Gondwana flora. Elements of Gondwana flora. Mega fossils and polynomorphs, their implication in stratigraphy and paleogeography.
- 5.10 Origin and evolution of vertebrates with special reference to horse and elephant. Evolution of men.
- 5.11 Radiometric dating and Laboratory methods of sediments study.
- 5.12 Common fossils found in Nepal.
6. **Structural Geology** (5 Marks)
- 6.1 Primary sedimentary structures and their significance in stratigraphy and structural geology. Diapirs and salt domes, their classifications and origin. Collapse structures.
- 6.2 Stress in two or three dimensions, Mohr diagram. Strain in two dimensions. Progressive deformation.
- 6.3 Fold morphology. Classification of folds. Fold mechanism: Single layer and multi layers. Small scale structures in folds and their interpretations. Distribution of strain in folds. Superposed folding. Criteria of recognition of folds.

- 6.4 Fault geometry and morphology. Classification of faults. Faults and associated minor structures. Balance cross sections. Stress distribution in faulting. Criteria of recognition of faults.
- 6.5 Joints: Geometrical classification. Mechanical analysis of fractures.
- 6.6 Lineation, cleavage, foliation and schistosity. Relationship between planer and linear elements.
- 6.7 Structures of Igneous and Metamorphic rocks.
- 6.8 Graphical treatment of fabric data, plotting and analysis of various structural elements including stereographic projection. Uses and limitations of Pi and Beta diagrams. Concept of preferred orientation. Fabric and its symmetry in tectonites and non-tectonites.
- 6.9 Structural geological mapping. Rule of V's. Identification of structural features of various generations.
- 6.10 Principles of Tectonic: Orogeny and Epeirogeny. Megascopic and microscopic structures. Thrusts and Napes, Schuppen (imbricate faults), and duplex.
- 6.11 Tectonic significance of linear structures. Geosynclines and continental margins.
- 6.12 Continental drift. Introduction to plate tectonics. Sea floor spreading, mid oceanic ridges, paleomagnetism, seismic zones. Transform faults and triple junctions. Island Arcs.
7. **Geology of Mineral Deposits** (5 Marks)
  - 7.1 Ore minerals, their textures and structures development in open space and in crystalline aggregates. Process of formation and transformation of ore.
  - 7.2 Endogenous Processes: Magmatic, pegmatitic, contact metasomatic and hydrothermal ore generations, emphasis on critical aspects of physicochemical conditions.
  - 7.3 Exogenous Processes: Residual process, chemical weathering and mechanical emphasis on chemical and accumulations. Sedimentary process including bacteriogenic and submarine exhalation and biochemical factors. Metamorphic process and metamorphosed ore bodies.
  - 7.4 Ores associated with ultramafic and mafic plutonic rocks. Ores associated with felsic plutonic rocks. Ores associated with acidic and mafic volcanic rocks, including those in greenstone belts. Stratiform and stratabound ore deposits associated with volcanic and sedimentary rocks. Placer deposits: Factors contributing to their formations.
  - 7.5 Oxidation and supergene sulphide enrichment, emphasis on the chemical aspects of the process. Residual concentration of ore: Bauxite and Laterite formation.
  - 7.6 Distribution, geological setting and ideas on ore deposition in Nepal.
8. **Hydrogeology** (5 Marks)
  - 8.1 Introduction: Hydrological cycle. Occurrences of groundwater. Hydrogeological properties of rocks and sediments. Vertical distribution of ground water. Types of aquifer, aquifer parameters, springs.

- 8.2 Groundwater Movements: Darcy's Law and its validity. Hydraulic conductivity and its determination by laboratory and field methods. Groundwater exploration techniques.
- 8.3 Water Wells: Different kinds of well structures, methods of drilling in hard rocks, soft rocks and unconsolidated sediments for groundwater development. Well design and well development. Well rehabilitation, estimation of well efficiency.
- 8.4 Influence of Environmental Factors on Groundwater Level: Secular, seasonal, diurnal and incidental changes.
- 8.5 Quality of Groundwater: Causes and measures of water quality, standard for different purposes of usage, sources of groundwater pollution.
- 8.6 Groundwater Resources of Nepal: Ground condition in different geological formations, groundwater potential of Nepal in mountains and Terai region.
9. **Engineering Geology and Geomorphology (5 Marks)**
  - 9.1 Role of engineering geology in planning, design, construction and maintenance of infrastructure. Engineering Geological Maps: Types and contents, scale and uses.
  - 9.2 Elements of Soil Mechanics: Engineering properties of soil, Unified soil classification system. Stress within an earth mass. Mohr circle. Stress distribution in loaded earth mass, failure criteria for soils. Consolidation, compaction and settlement.
  - 9.3 Elements of Rock Mechanics: Engineering properties of rocks, rock mass classification, rock mass rating (RMR) and Q system, analysis of rock slope, stability, use of stereographic projection, failure criteria of rock slopes.
  - 9.4 Rock and Soil as Construction Materials: Requirement for selecting borrow area, searching and exploration of construction materials. Properties of construction materials, dimension and decorative stones.
  - 9.5 Landslides: Classification, factor causing landslides, analysis and control of landslides. Problems of landslides and Glacier lake outburst flood (GLOF) in Nepal and their mitigation methods.
  - 9.6 Introduction to geomorphology, scope and its relation to other sciences. Concept of relief, order and physical landscape, their types, nature of development, stage of maturity. Major geomorphological subdivisions of Nepal, their characteristics and evolution.
  - 9.7 Weathering of rocks, factors controlling weathering, depth of weathering zones, types of weathering, weathering in relation to climate.
  - 9.8 Soil forming factors and processes. Development of soil profiles and classification of soils. Prevention of soil erosion.
  - 9.9 Glaciers: Their origin, structural features (Erosional and depositional), classification. Causes of glaciation. Pleistocene glaciation and its distribution.
  - 9.10 Fluvio-glacial and fluvio-genetic cycle of landscape. Drainage, its development pattern, relation to geological structures and types. Morphometric measurement and analysis. Peneplains. Characteristics of Bhabar and Terai regions. Water logged swamps. Floods and their control.

9.11 Tectonic landforms and landforms due to volcanism.

9.12 Development of badlands. Origin of deserts, advancing of desert and preventive measures.

10. **Geophysics and Geochemistry** (5 Marks)

10.1 Methods of geophysical exploration. Arrangement of observation points with respect to geological objects. Geophysical anomaly, regional and local anomalies, factors controlling the anomaly. Factors giving rise to noise, qualitative and quantitative interpretation.

10.2 Gravity Methods: Newton's Law of gravitational attraction. Gravitational potential and equipotential surfaces. Geoid, curvature and gradient. The shape and size of the earth.

10.3 Magnetic properties of rocks and minerals. Theory of origin of earth magnetism. Variation with time in the earth's magnetic field. Geomagnetic field and its elements. Basic principles of rock magnetism, paleomagnetism. Magnetic surveying procedures.

10.4 Electrical Methods: Basic concepts and definitions. Electrical properties of rocks and soils. Induced polarization (IP), self potential (SP) and electrical resistivity methods.

10.5 Earthquake and structure of the earth. Path and types of earthquake waves. Earthquake magnitude and intensities, different types of magnitude and intensity scales and their relationship, strong ground motion, historical earthquakes of Nepal.

10.6 Seismic Refraction Methods: Wave paths and time distance relations for horizontal layers. Continues change of speed with depth.

10.7 Seismic Reflection Methods: Selection of appropriate source, geometry of reflection path of horizontal interfaces. Reflection from dipping interfaces. Choice of shooting procedures. Determination of average velocity. Correction used in reduction of reflection records.

10.8 Geophysical Well Logging Methods: Self-potential logging. Resistivity logging. Natural gamma logging.

10.9 Principles of geochemistry, the structure and composition of the earth, elements, structures of the atoms, molecules and ions. Lithosphere, hydrosphere, atmosphere, biosphere, geochemical cycle.

10.10 Geochemical Exploration Methods: Primary and secondary dispersion pattern, element mobilities, soil and stream sediment survey. Geochemical anomalies, background value, threshold value, anomalous values, anomalous areas, anomaly categorization, interpretation of geochemical data, graphical plotting of data. Application of geochemistry in mineral exploration. Geochemical maps.
